

## REPORT ON ENTREPRENEURSHIP DEVELOPMENT WORKSHOP ON

### “INTERNET OF THINGS (IoT)”

12<sup>th</sup> March, 2022

Time: 11 AM to 1.30 PM

Organized by Department of Computer Applications

The Department of Computer Applications, Morigaon College, hosted a Entrepreneurship Development Workshop on “Internet of Things (IoT)” which is held on 12-03-2022 at the Auditorium at 11:00 AM. The workshop commenced with the invitation of the guests and dignitaries to the dais by Mr. Bulbul Das, Head, Department of Computer Applications. The program was chaired by Dr. Lila Kanta Barthakur, Hon’ble Principal of Morigaon College. The Chairperson, Resource person and other guests were duly felicitated with “Phulam Gamucha” and bouquets of flowers by the faculty members of the Department of Computer Applications.

After that, the inaugural lecture is delivered by Dr. Lila Kanta Barthakur, Principal of Morigaon College. The speech emphasized on the prospects of entrepreneurship and its necessity in the state and especially in Morigaon region for future development. He ended his speech with the invitation to the guest speaker for presentation on the topic.

The presentation by the resource person **Md. Abdul Malik** comprised of a brilliant interactive lecture on Internet of Things. IoT is a new revolution of the Internet. A world where the real, digital and the virtual are converging to create smart environments that make energy, transport, cities and many other areas more intelligent. A device become a smart device is called IOT. Now a days there are many android and server based application. All the students actively participated in the event to make it a grand success.

IoT is a global network infrastructure, linking physical and virtual objects using cloud computing, data capture, and network communications. It allows devices to communicate with each other, access information on the Internet, store and retrieve data, and interact with users, creating smart, pervasive and always-connected environments. The Internet of Things (IoT), sometimes referred to as the Internet of Objects, will change everything— including ourselves.

This may seem like a bold statement, but considering the impact the Internet already has had on education, communication, business, science, government, and humanity. Clearly, the Internet is one of the most important and powerful creations in all of human history. Now consider that Internet of Things represents the next evolution of the Internet, taking a huge leap in its ability to gather, analyze, and distribute data that we can turn into information, knowledge, and, ultimately, wisdom. In this context, Internet of Things becomes immensely important. The vote of thanks was delivered by **Ponkhi Bonikya** at the end of the session.
